Last summer, we expected Hurricane Beryl to continue its projected track to the west of Houston. We expected to have a little rain, a noisy night from the thunder, and to wake up to yet another hot and humid summer day. Instead, we got a hurricane that veered right and ripped out roofs, trees, and powerlines with heavy wind no one expected to hit the 4th largest city in the US.

It was weird, y'all.

Thankfully, everyone at Xist Publishing was safe and sound. Property damage at our office and homes was minimal, and you, our customers, were patient with the delays in communication and shipping as we navigated a week without power or internet access.

A couple weeks after the wind, the county finally reached my neighborhood for debris cleanup. A massive claw arm scooped the downed trees that had been dragged to the curb and I stood with my neighbors as we watched the magic of modern machinery.

As we marveled, I was struck by how good it felt. We were kids again, discovering something new and delighting in the process.

That's why we publish books. The world is filled with amazing things and it is a privilege to invite kids to discover their place in it.

We love introducing kids to new books, and this spring, I'm thrilled to bring our own special blend of delight to dinosaurs, dancers, and dogs. We have new beginning readers celebrating trucks (I had to!) and fresh fairy tales for young readers.

As we head into 2025, I hope you have a (hurricane-free) opportunity to discover something new in our wonderful world. Let's all help kids find discovery and delight in new books!

Keep Reading,

The Dancing Through Life Series is an inspiring collection of nonfiction books for young readers, each focusing on a different dance style from around the world. These beautifully crafted books explore the history, culture, and fundamental techniques of various dances, from ballet to hip hop and beyond. With engaging text and captivating photographs, each book encourages children to discover the joy of movement, express themselves through dance, and learn about the diverse traditions that make each style unique. Perfect for young dancers and those curious about the art of dance, the Dancing Through Life Series celebrates the universal language of dance and its power to bring people together.

Having applause from the audience makes the dancers feel appreciated. Each clap shows that the audience enjoyed the performance. This makes the dancers feel happy and proud. It shows that all their hard work has paid off.

Performing in a group adds to the joy. Bollywood dance is often done with many dancers moving together. Dancers support each other on stage, creating a sense of teamwork. They move in sync, making the performance beautiful and lively.

The joy of performing Bollywood dance stays with the dancers even after the show ends. They feel a sense of accomplishment. They know they have done their best and shared something special. This feeling inspires them to keep dancing and improving.

Chapter 3: Ballet Basics

First Steps: Positions and Movements

Ballet is built on a strong foundation of basic steps and positions. These basics are the first things every dancer learns when they start ballet. Mastering these moves takes time and practice, but they are the building blocks for everything else in ballet.

The first thing a dancer learns is the positions of the feet. There are five main positions, each with a different way to place your feet. These positions help dancers keep their balance and move smoothly from one step to another. Learning these positions is like learning the ABCs of ballet.

Next, dancers learn how to plie. A plie is when a dancer bends their knees while keeping their feet flat on the ground. This move helps to warm up the legs and make them stronger. It also helps dancers to jump higher and land softly.

Another important move is the tendu. In a tendu, the dancer slides one foot along the floor, pointing their toes. This move makes the legs and feet stronger and more flexible. It also looks very elegant.

As dancers get better, they learn to jump and spin. A jump in ballet is called a sauté. Dancers must push off the ground with their feet and land softly. Spinning is called a pirouette. To do a pirouette, a dancer must turn on one foot while keeping their body balanced.

These basic steps and positions are the start of every ballet. They help dancers move gracefully and tell the story with their bodies. Even the most advanced dancers practice these basics every day. They are the foundation of every beautiful ballet performance.

Little Lectores

Authentic Spanish for Beginning Readers

Little Lectores is a 32-book series of Spanish decodable readers that is specifically designed for children who are learning to read in Spanish. These books use a systematic approach to guide readers through the Spanish vowel system, starting with very short sentences and simple words that students can sound out on their own. As the series progresses, the books become more complex, with longer sentences and more complex vocabulary. The series features reoccurring characters of Paco, his dog, Coco, and his neighbor and best friend, Zita. The stories were written in authentic Spanish by Katrina Streza and Ariana Vargas, making the series an excellent resource for Spanish-speaking students learning to read in their native language as well as Spanish language immersion programs and ELL teachers.

Realism started in France after a period of time when art only showed the luxuries of the rich, and a perfect, beautiful world.

The goal of Realist artists is to show everyday life and struggles, including the lives of the working and poor.

The Impact

Realism is important to art because it was the first type of art that showed poor and working people in a positive way.

Realism is also important because it influenced other styles of art, like Impressionism.

Your Turn

Now it is your turn to make a Realist painting.

Who will your painting be of?
 Will you paint working people or animals?
 What will they be wearing?
 What colors will you use?

The Art

The Impressionist style was developed in France in the 19th century.

Impressionist artists were interested in capturing the light and color of the world around them.

They used short, visible brushstrokes and a limited color palette.

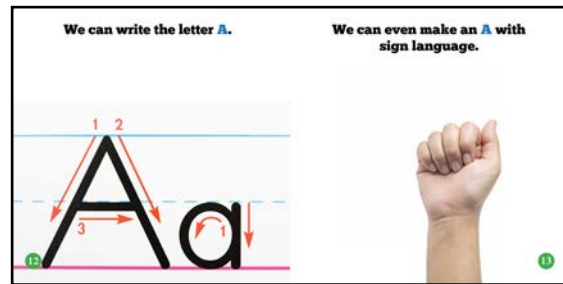

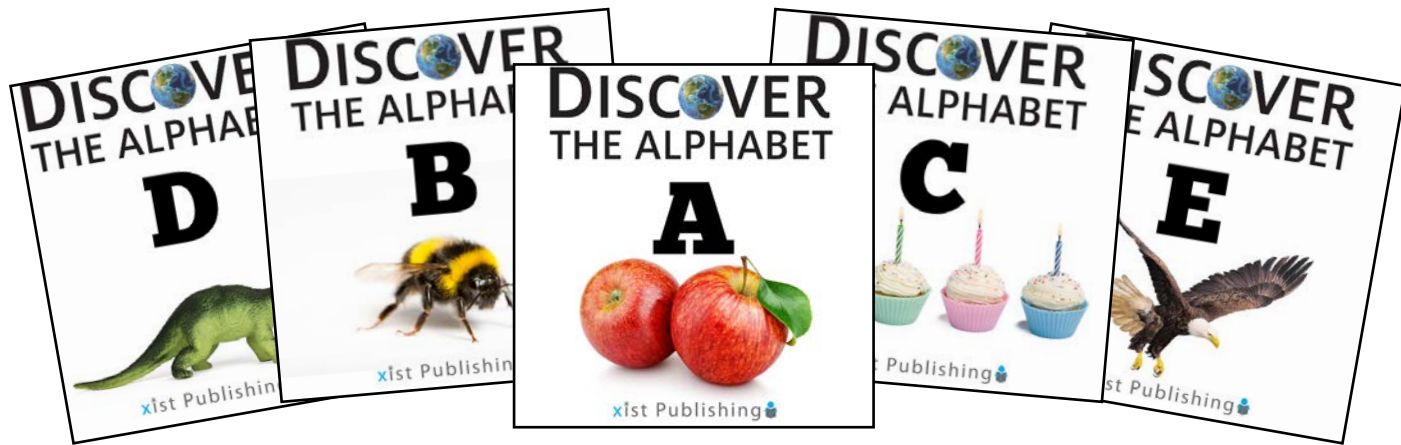

They often painted outdoors and used natural light as their main source of illumination.

The Techniques

Realist artists became popular after the French Revolution of 1848, as the working peasants rose against the rich and powerful.

These artists thought that art should show ordinary people and ordinary places.
